

Project Manager: Rooftop PV

Introduction to SOLA Future Energy

At SOLA, we believe that Africa's future relies on affordable, clean and accessible energy. Solar energy – a distributed power source that can run a building, factory, or even an island for 25 years – can pay off in just 5 years. We drive an inclusive economy in Africa through our clean and reliable energy systems, that create sustainable savings for commercial and industrial properties. SOLA has an established track record of successful projects in South Africa.

Overall purpose of the position:

The primary purpose of the Project Manager to ensure the successful completion of all rooftop solar photovoltaic construction projects as assigned.

Reports to: Chief Project Manager
Location: Cape Town, South Africa

Sample of Key Performance Areas (KPA's):

- Project manage solar PV projects from design freeze to completion.
- Ensure that projects run according to a quality, costing and time plan.
- Manage subcontractors (including electrical and mechanical subcontractors), contracts, schedules and costs.
- Liaising with technical personnel and client appointed consultants.
- Responsible to understand the design accurately, and ensure that the design is realised onsite.
- Commission and test projects upon completion.
- Provide guidance to contractors on how projects should be completed.
- Manage and deliver logistics plan.
- Work with scaffolding, crane, rigging contractors.
- Complete project reports and documentation, as per agreed process.
- Assist with engineering, procurement and logistics where required.
- Performing the tasks and roles that may ordinarily form part of the day-to-day role of Project Manager.

The ideal candidate will have:

- Relevant Engineering or Technical degree from a reputable tertiary institution is essential;
- At least 5 years prior experience managing PV installations (preferably rooftop). The ideal candidate will have an excellent track record managing and delivering projects.
- Must be fully proficient in English (verbal and written communication);
- Must be fully computer literate (proficient in the use of MS Office Suite and Google App Suite).
- Must have a valid drivers' license and willing to travel between project sites within the region.
- The ideal candidate will be passionate about the renewable energy industry and the company's contribution to the future of energy; He/she will embody respect and responsibility in the full sense of the word, and will enjoy contributing to a team of highly knowledgeable professionals.
